WHAT IS OCB?

OCB is a **network of scientists** working across disciplines to understand the ocean's role in the global carbon cycle and how marine ecosystems and biogeochemical cycles are responding to environmental change.

OCB SCIENCE

Biological pump

Changing marine ecosystems

Ocean observing
(ships, autonomous, space)

Estuarine and coastal carbon fluxes

Ocean carbon uptake

Changing ocean chemistry

OCB SUPPORT ROLES

- ✧ **Coordination** of science workshops and activities
- ✧ US and international **science planning**
- ✧ **Communication and networking** (website, email newsletters, science highlights, social media)
- ✧ Development and dissemination of **education and outreach** materials
- ✧ **Training and engagement of early career** scientists

OCB LEADERSHIP

- ✧ **OCB Project Office** funded by NSF and NASA, based at WHOI
- ✧ **OCB Scientific Steering Committee (SSC)**
- ✧ **OCB Topical Subcommittees:** Ocean Time-Series and Biogeochemical Argo

OCB PARTNER PROGRAMS

**Participate in OCB
activities**
