

EXport Processes in the Ocean from RemoTe Sensing (EXPORTS): Predictability

Scott Doney (WHOI)

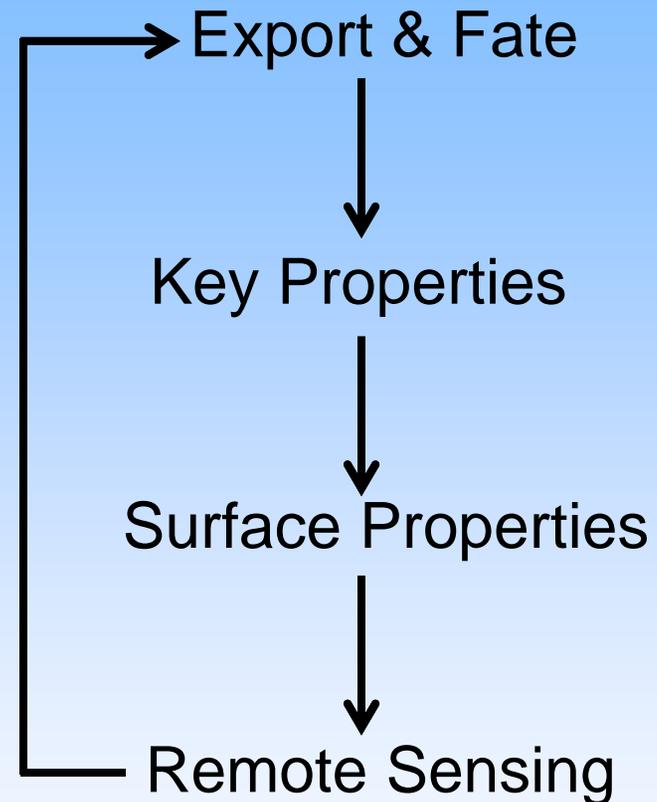

Ocean Carbon & Biogeochemistry Summer Meeting
Woods Hole, MA (July 2016)

EXPORTS Sub-Question 3 Schematic

Reduce uncertainties in contemporary & future estimates of the export and fate of upper ocean net primary production

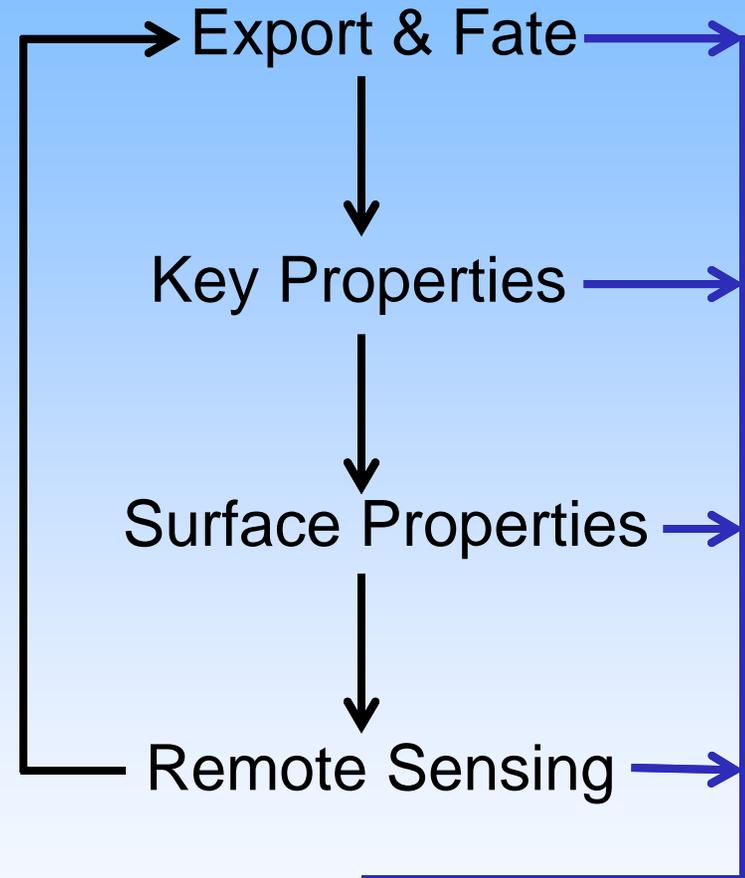

SQ3-A,B,C

EXPORTS Sub-Question 3 Schematic

Reduce uncertainties in contemporary & future estimates of the export and fate of upper ocean net primary production

Predictability of Fate & Export of Net Primary Production

Export flux:

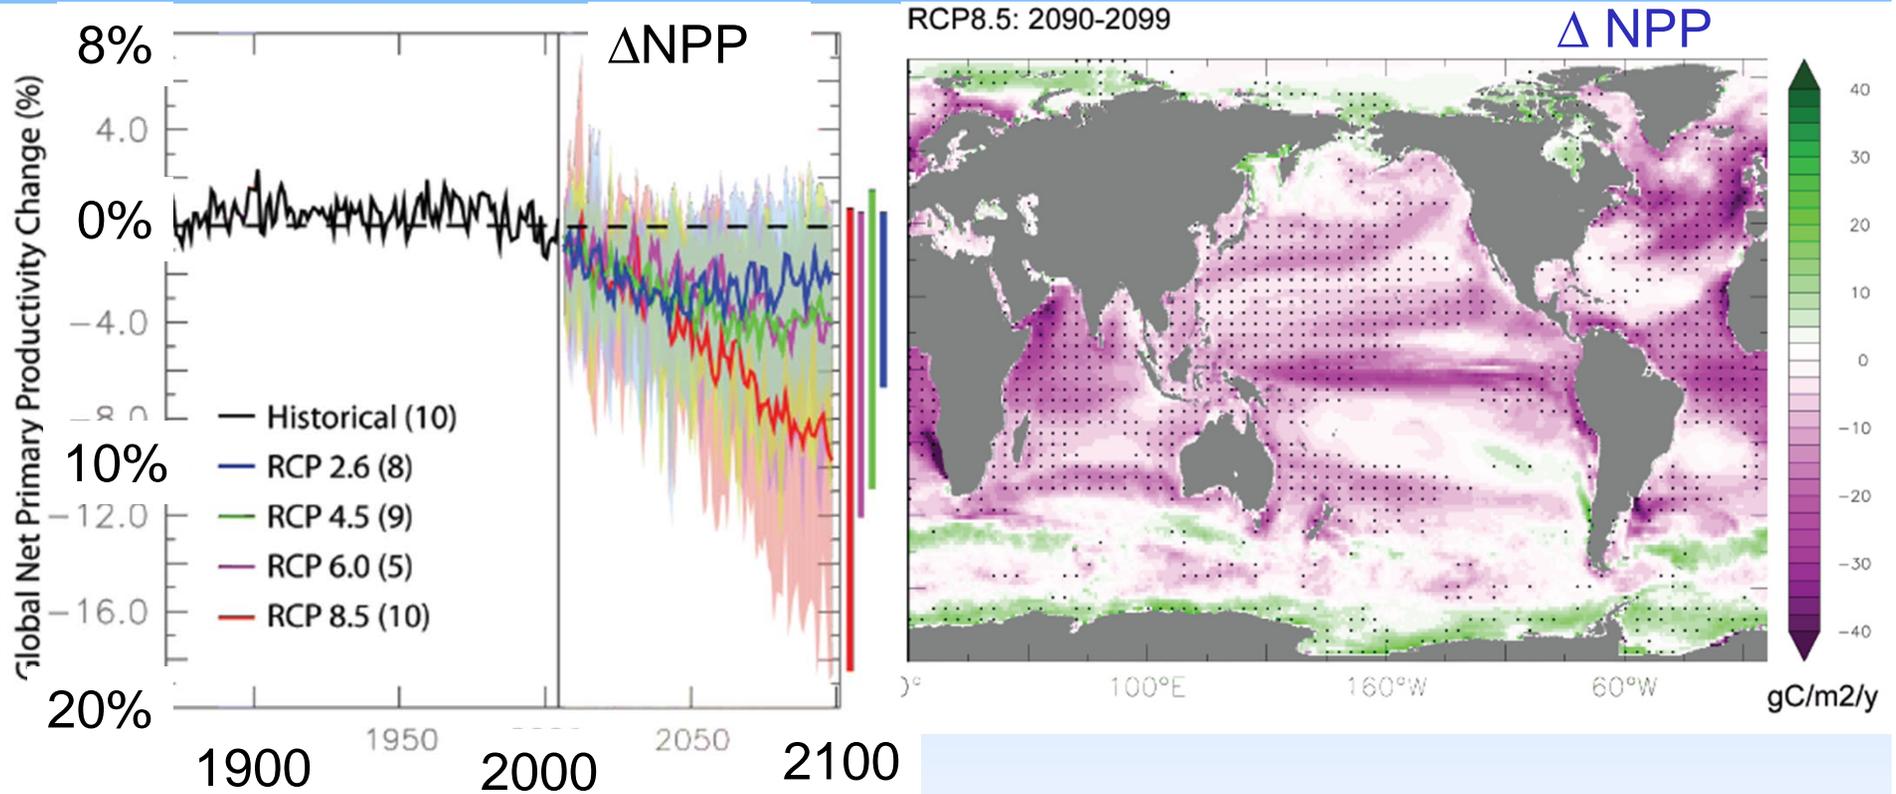

- remote sensing algorithms & diagnostic models
- incorporation of food web & size structure
- large differences in prognostic model patterns, dynamics & climate sensitivity
- some pathways missing in Earth System Models

Mesoscale transport & remineralization

- empirical curve fitting used in most diagnostic & prognostic models
- mechanistic process models (particle dynamics and to lesser extent food web)
